ABSTRACT I am a fifth year PhD student at The University of Pennsylvania under the supervision of Davi Maximo. My primary interests lie in geometry and analysis, especially in geometric partial differential equations and geometric measure theory. I was previously an undergraduate at The University of Texas at Austin, where my advisers were Francesco Maggi and Salvatore Stuvard.

RESEARCH

- **Current Research**, UPenn Ongoing
  - Broadly, I am interested in problems from geometric analysis concerning curvature bounds and their consequences. Major themes in my work are those of *rigidity* and *almost rigidity*, wherein one studies how well geometric and analytic measurements of an object help identify it.
- **Stability of Convex Disks** Fall 2022
  - To appear in Calc. Var. and PDEs (2023), Preprint: https://arxiv.org/abs/2301.13130.
- **Allard Type Regularity Theorems for Rectifiable Varifolds** Fall 2018 – Spring 2019
  - Undergraduate Thesis at UT Austin. Advisers: Francesco Maggi and Salvatore Stuvard.
